The Vision: To unlock the capital tied up in the world's largest asset class.

Turn residential housing from a one-off sale event into a sustainable income-producing asset class for retirees, without sacrificing ownership or legacy.

The Problem: 36M U.S. retirees are suffering because most of their net-worth is tied-up in illiquid, residential property value...

Homeowners

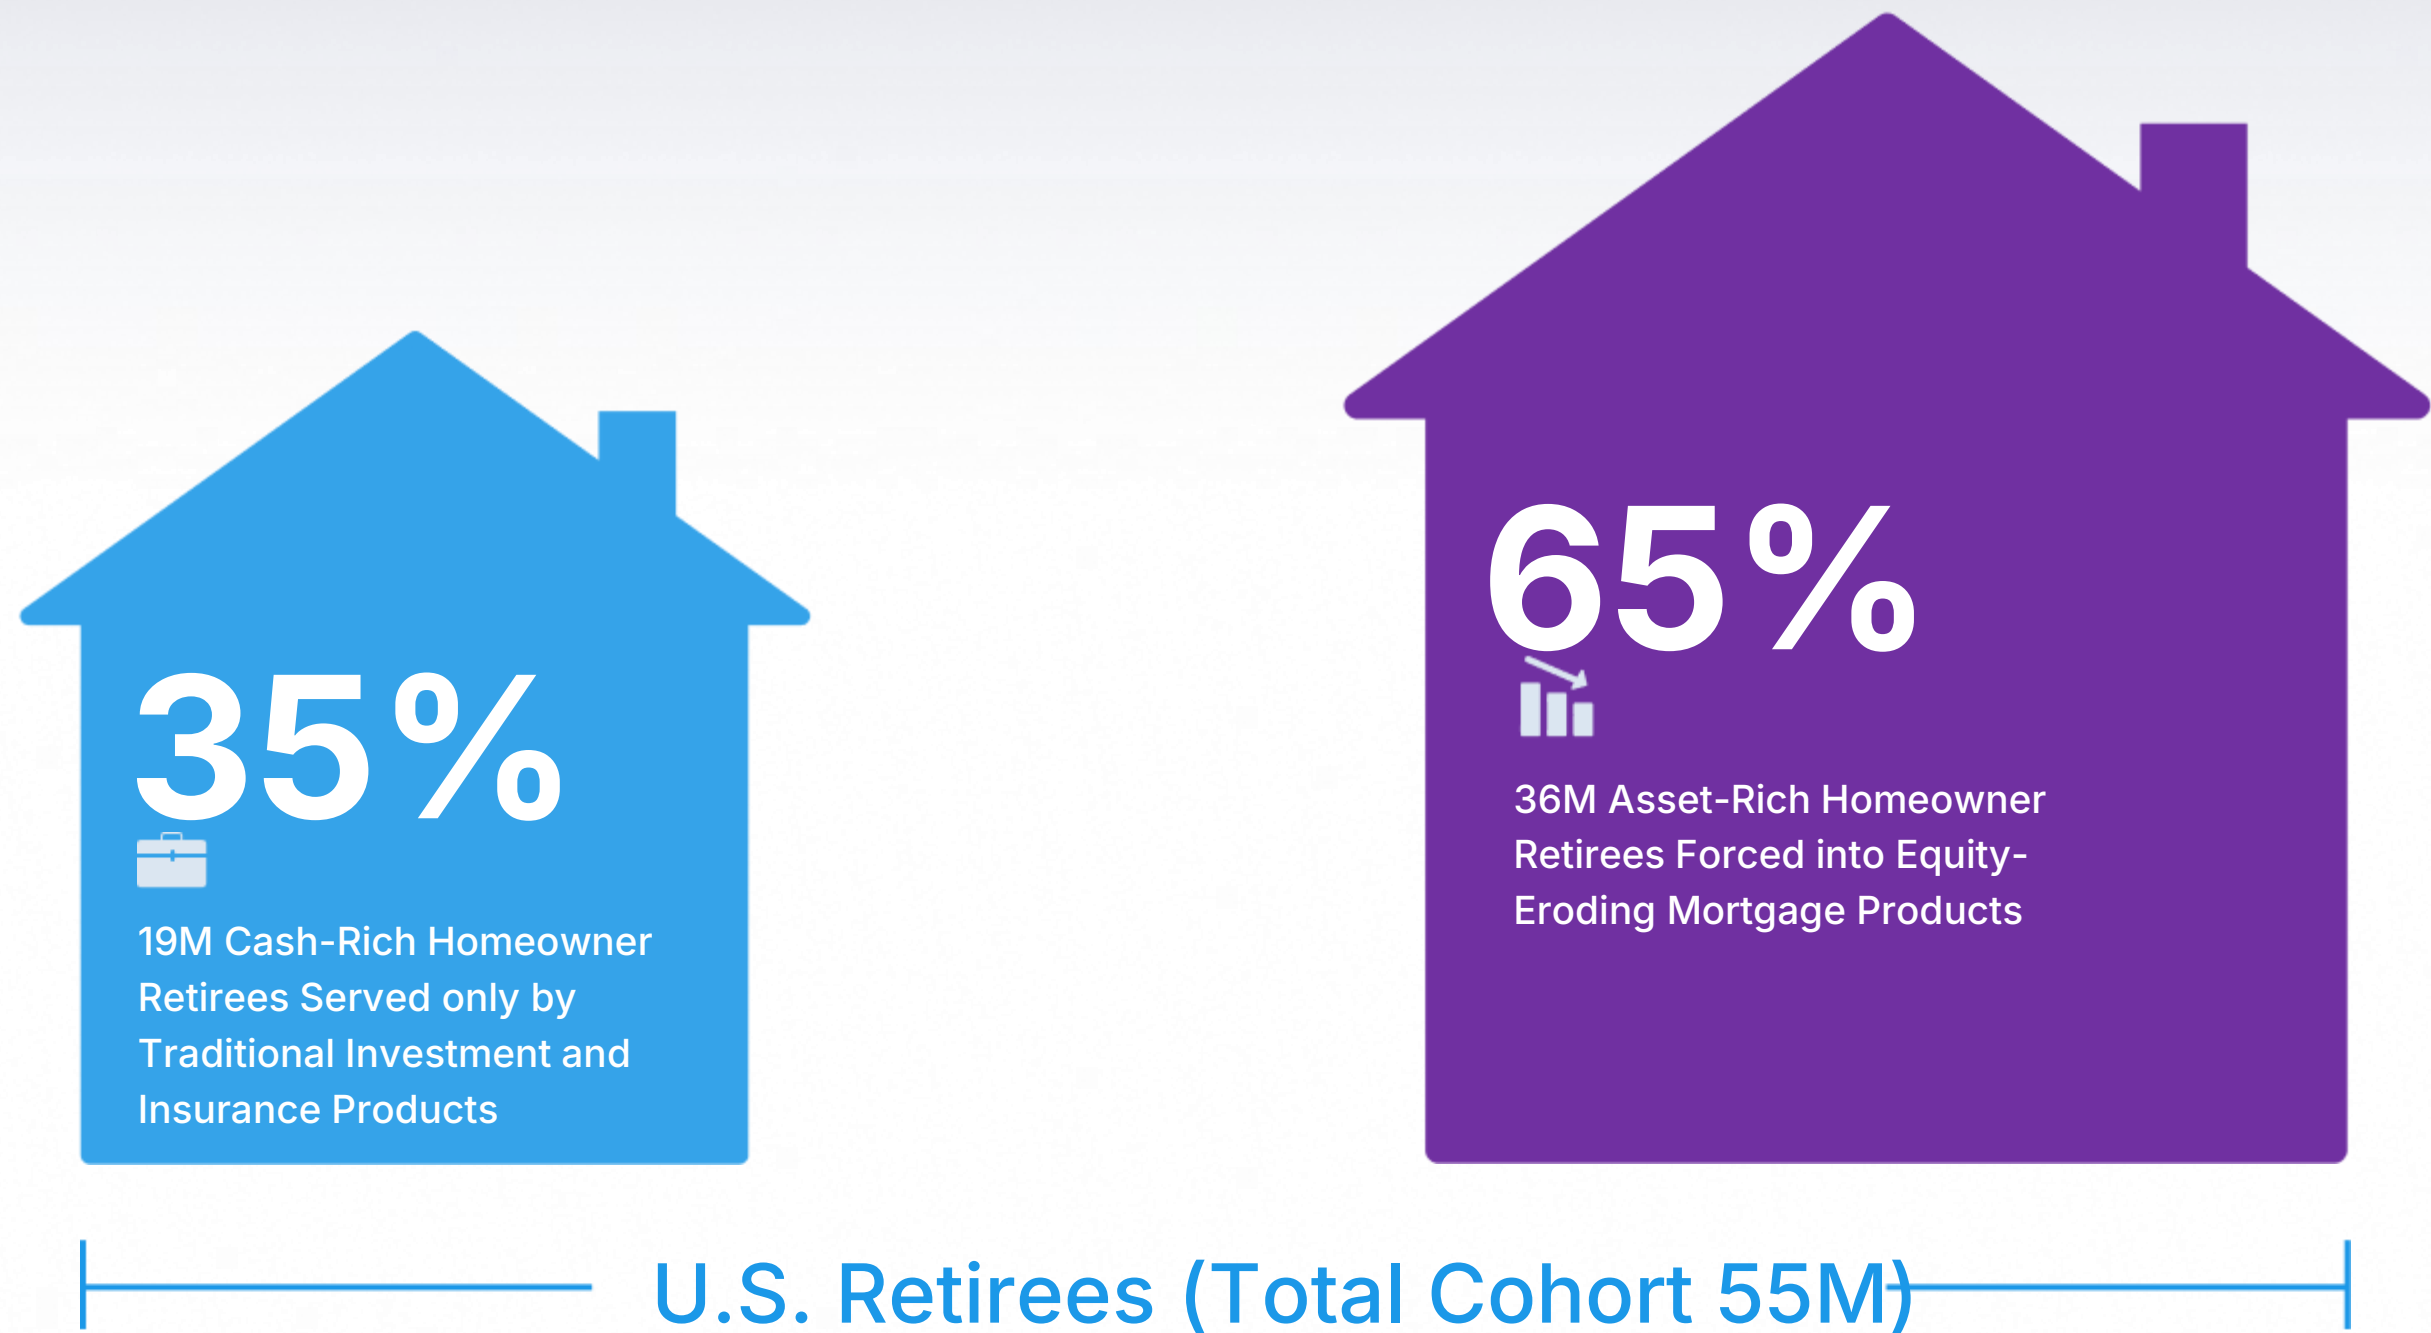

\$20T in locked up equity
Av U.S. retiree = \$200K-300K home equity
36M under-funded for retirement

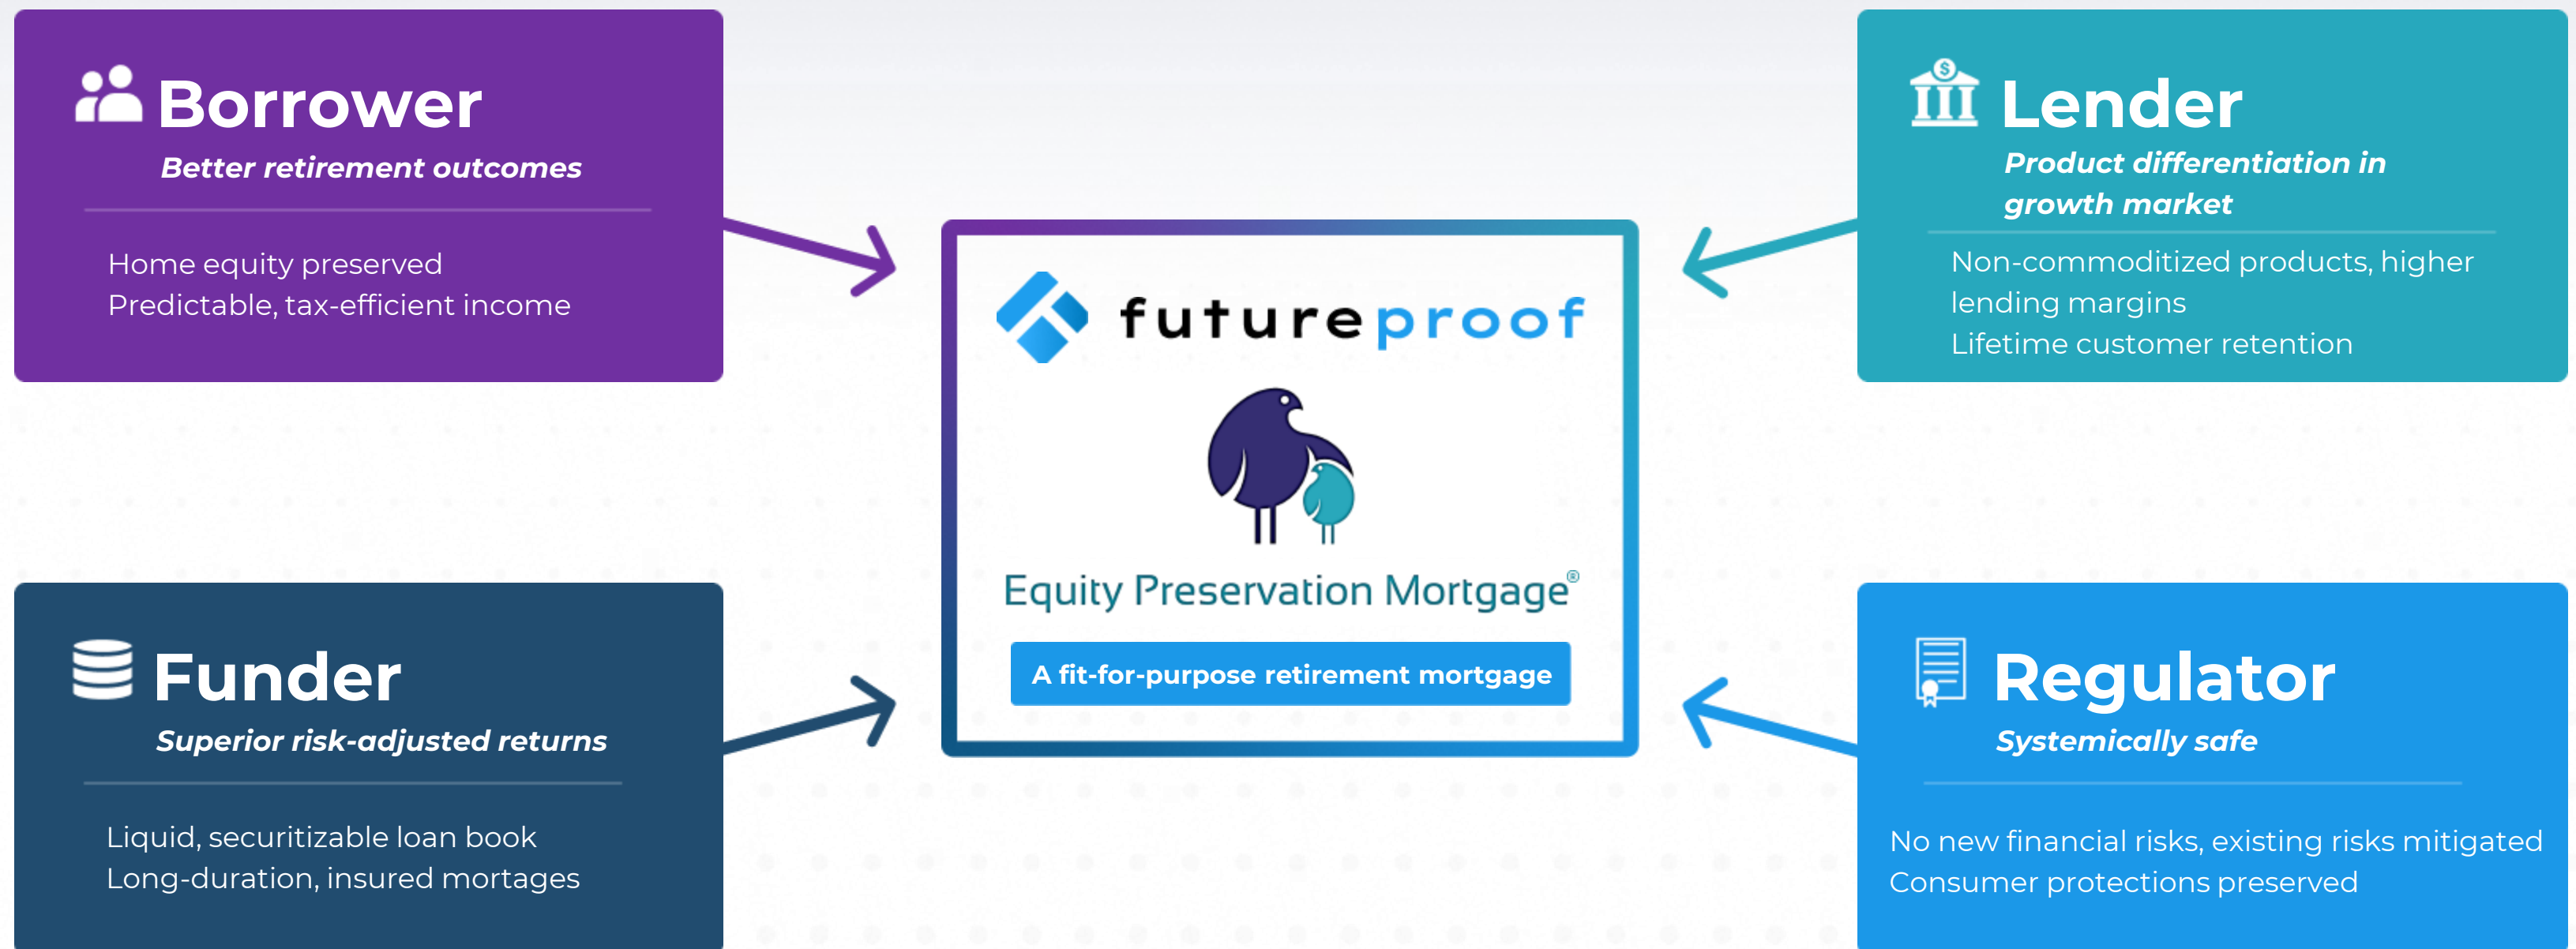

Retirees

Av. Retirement savings \$200K
Av. Net Worth \$410K
Housing $\geq 50\%$ of their net worth

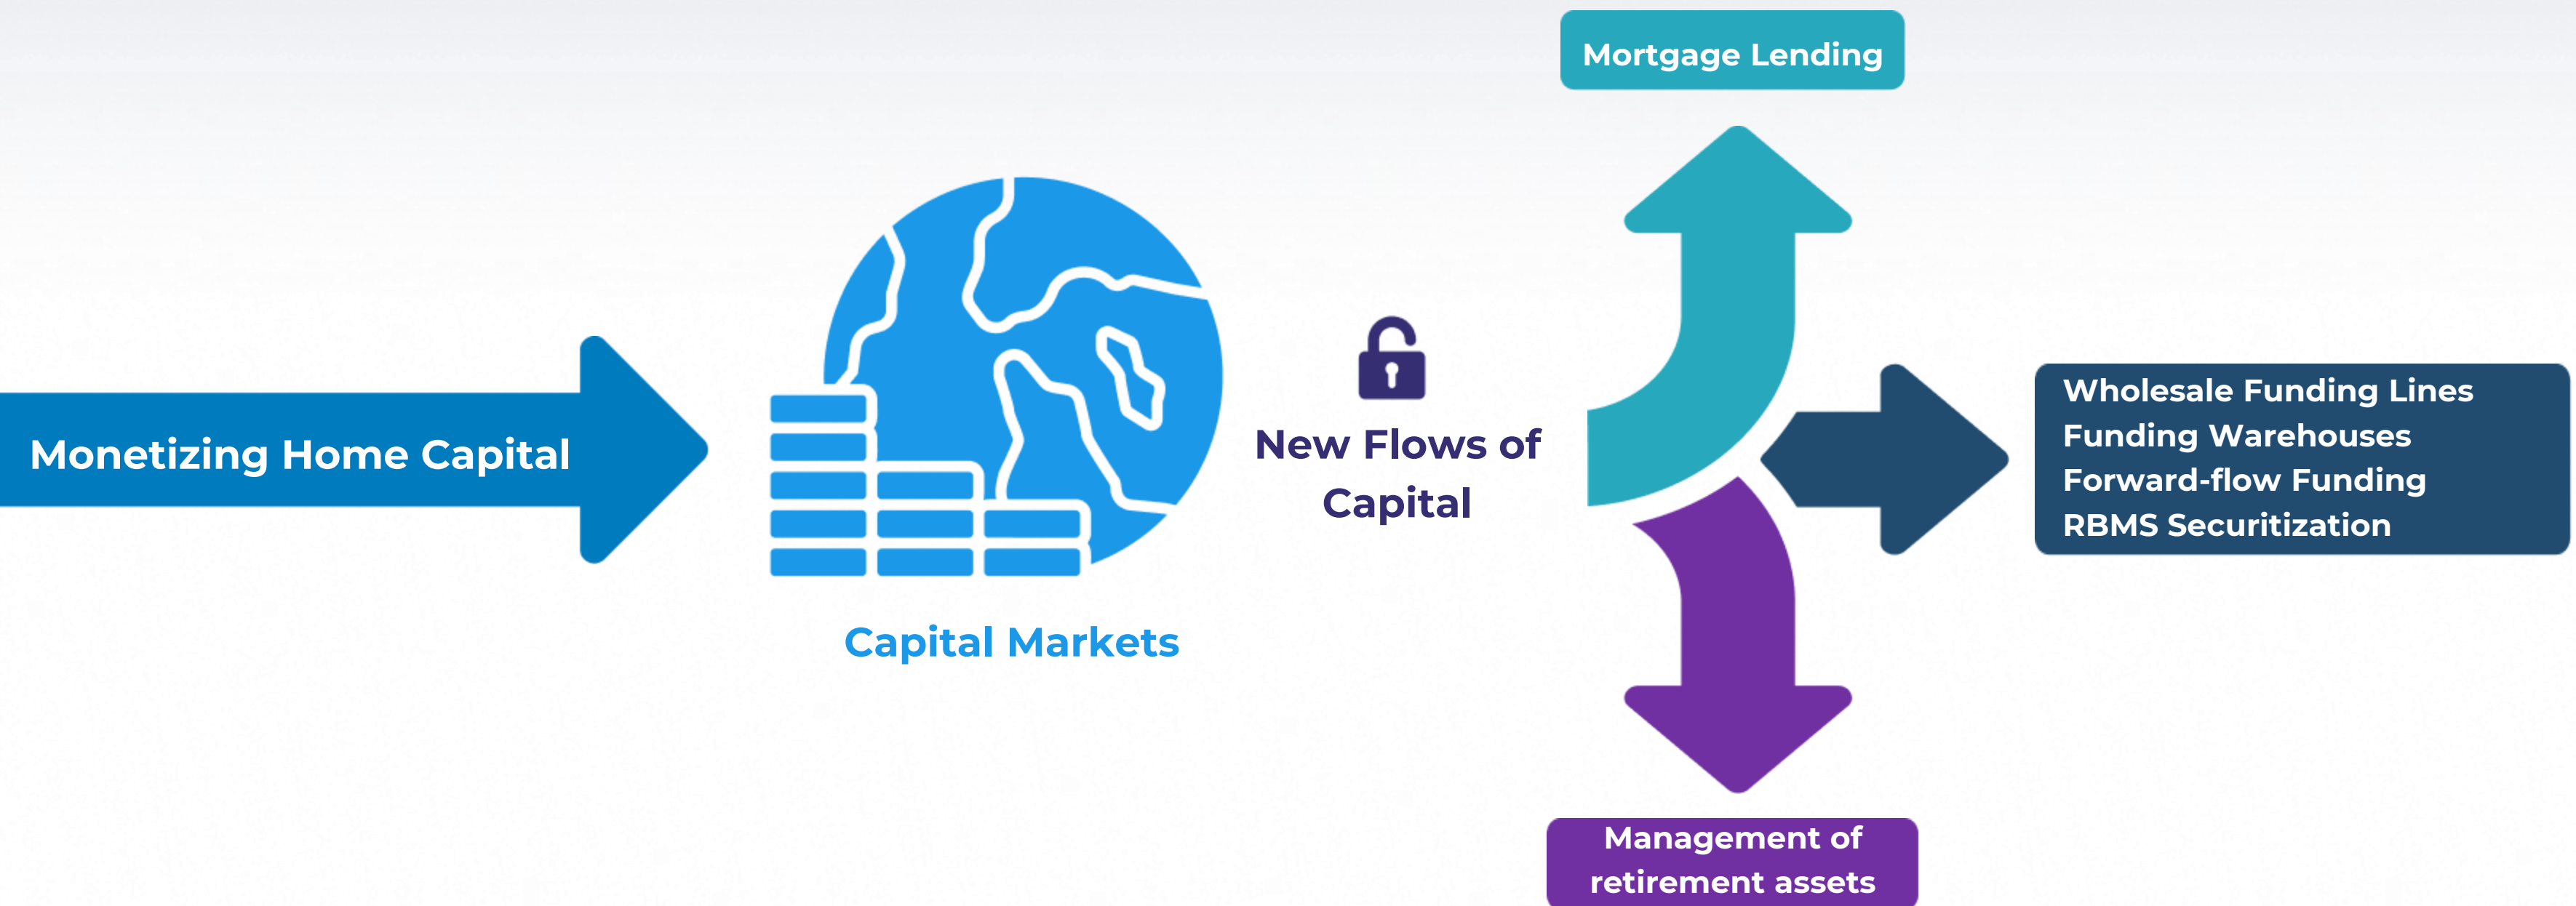

...no U.S. bank or insurance carrier any 'fit-for-purpose' mortgage product offering for the asset-rich cash-poor in over 35 years.

The Solution: A breakthrough lower-risk mortgage that fuels the next-generation of financial products for retirees, embedded in an AI-native SaaS Platform...

...unlocking **\$20T** in available capital for asset-rich, cash-poor homeowners to fund their golden years and creating new capital flows for U.S. financial institutions

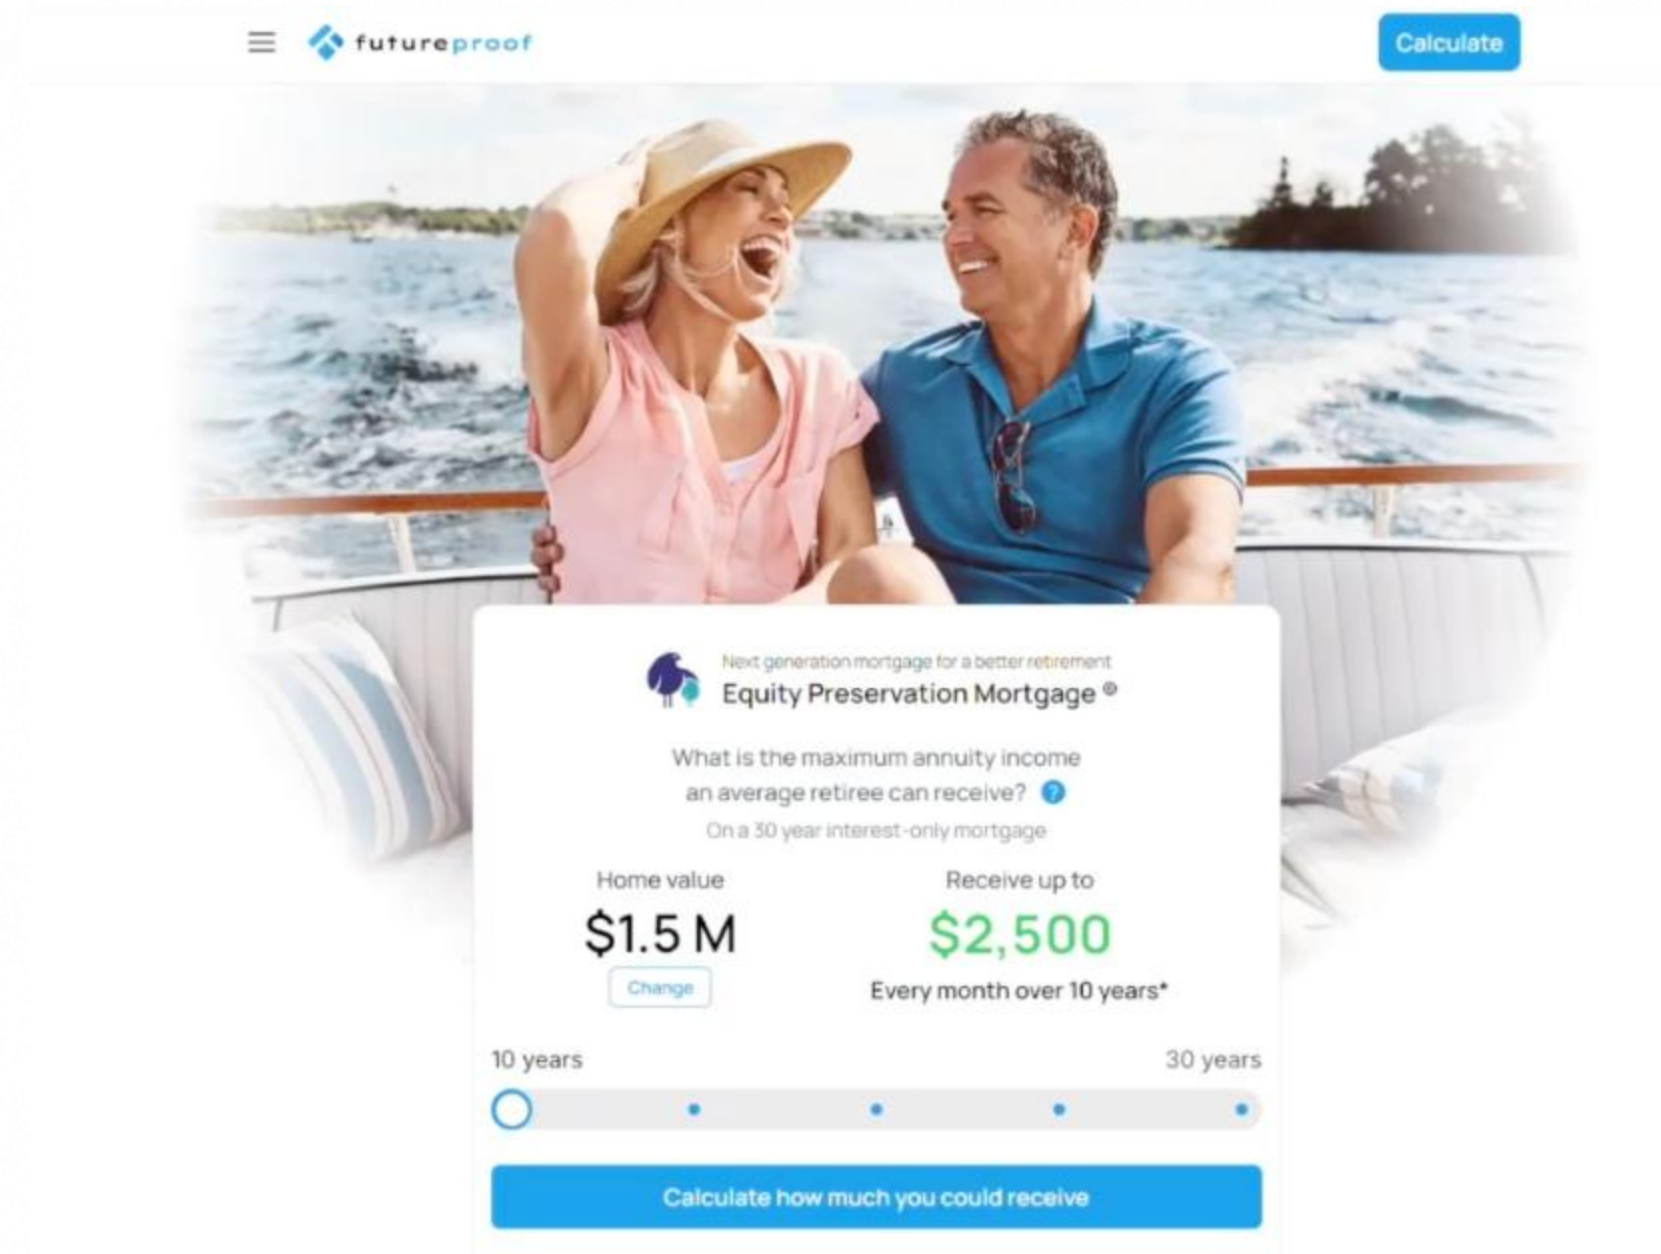

The Product: A new index-linked mortgage referenced to the S&P500 to monetize home capital into tax-free annuity income, without eroding equity or future property value.

Key Product Innovations:

- Interest paid on behalf of borrower
- No borrower serviceability risk
- Traditional credit risk replaced by long-term index risk
- Mortgage offset account holds and deploys loan capital
- Reference assets held are passive Index ETFs
- Long-term total return of S&P Index over 30 years (~10% p.a.)
- Built-in volatility control and continuous dynamic hedging
- Mortgage insurance removes residual risk for lender
- Portfolio reinsurance removes tail risk for mortgage funder
- Long-duration mortgages smooth index returns and create end-of-term profit

Quick Demo: Annuity & Mortgage Calculator now in alpha release for user testing, ahead of initial market launch in Australia, ahead of USA.

The screenshot shows the Futureproof website interface. At the top left is the Futureproof logo, and at the top right is a blue 'Calculate' button. The background is a large image of a smiling couple on a boat. Overlaid on this is a white calculator box titled 'Next generation mortgage for a better retirement Equity Preservation Mortgage®'. The box contains the question 'What is the maximum annuity income an average retiree can receive?' with a help icon. Below this, it specifies 'On a 30 year interest-only mortgage'. The input field 'Home value' is set to '\$1.5 M' with a 'Change' button. The output field shows 'Receive up to \$2,500' in green, with the note 'Every month over 10 years*'. A slider at the bottom allows selection between '10 years' and '30 years', with a blue circle currently positioned at the 10-year mark. A large blue button at the bottom of the box reads 'Calculate how much you could receive'.

Traction: Building a global ecosystem of top-tier U.S. institutional partners like Accenture, EY, Jones Day, BlackRock, SpiderRock and more...

(U.S.) Global Collaboration Partner & Approved Business Intermediary

(U.S.) Global Legal Partner

(Non-U.S.) In-Country Regulatory Partners

(U.S.) Product Co-Design Partners

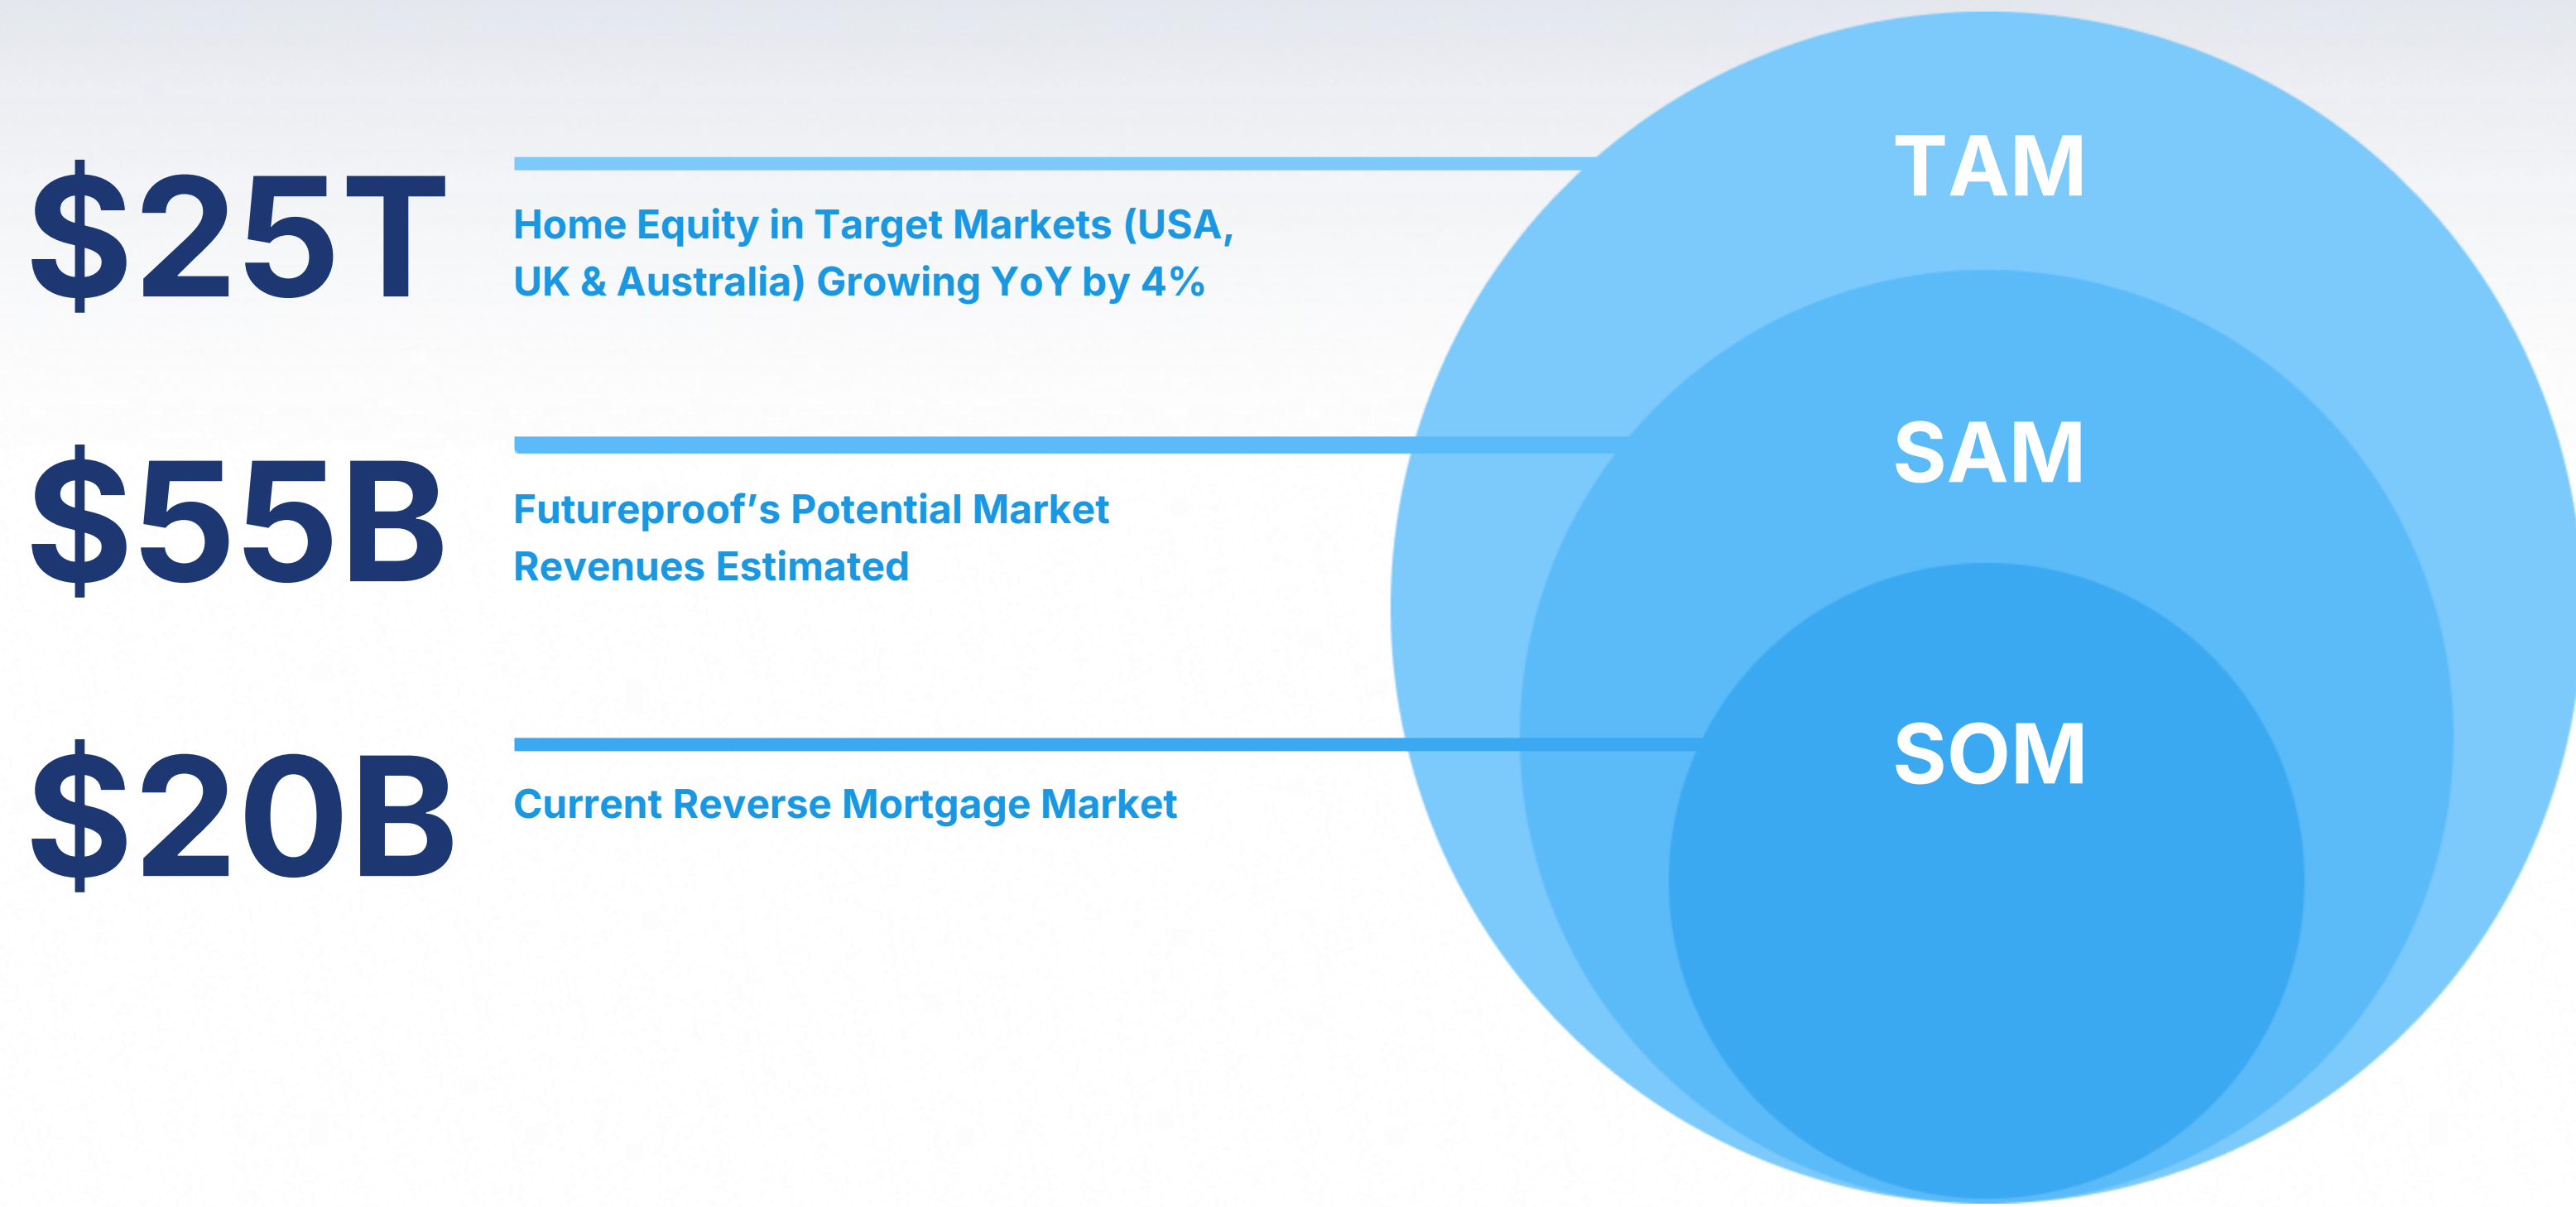

(U.S.) Global Platform Partners (In Negotiation)

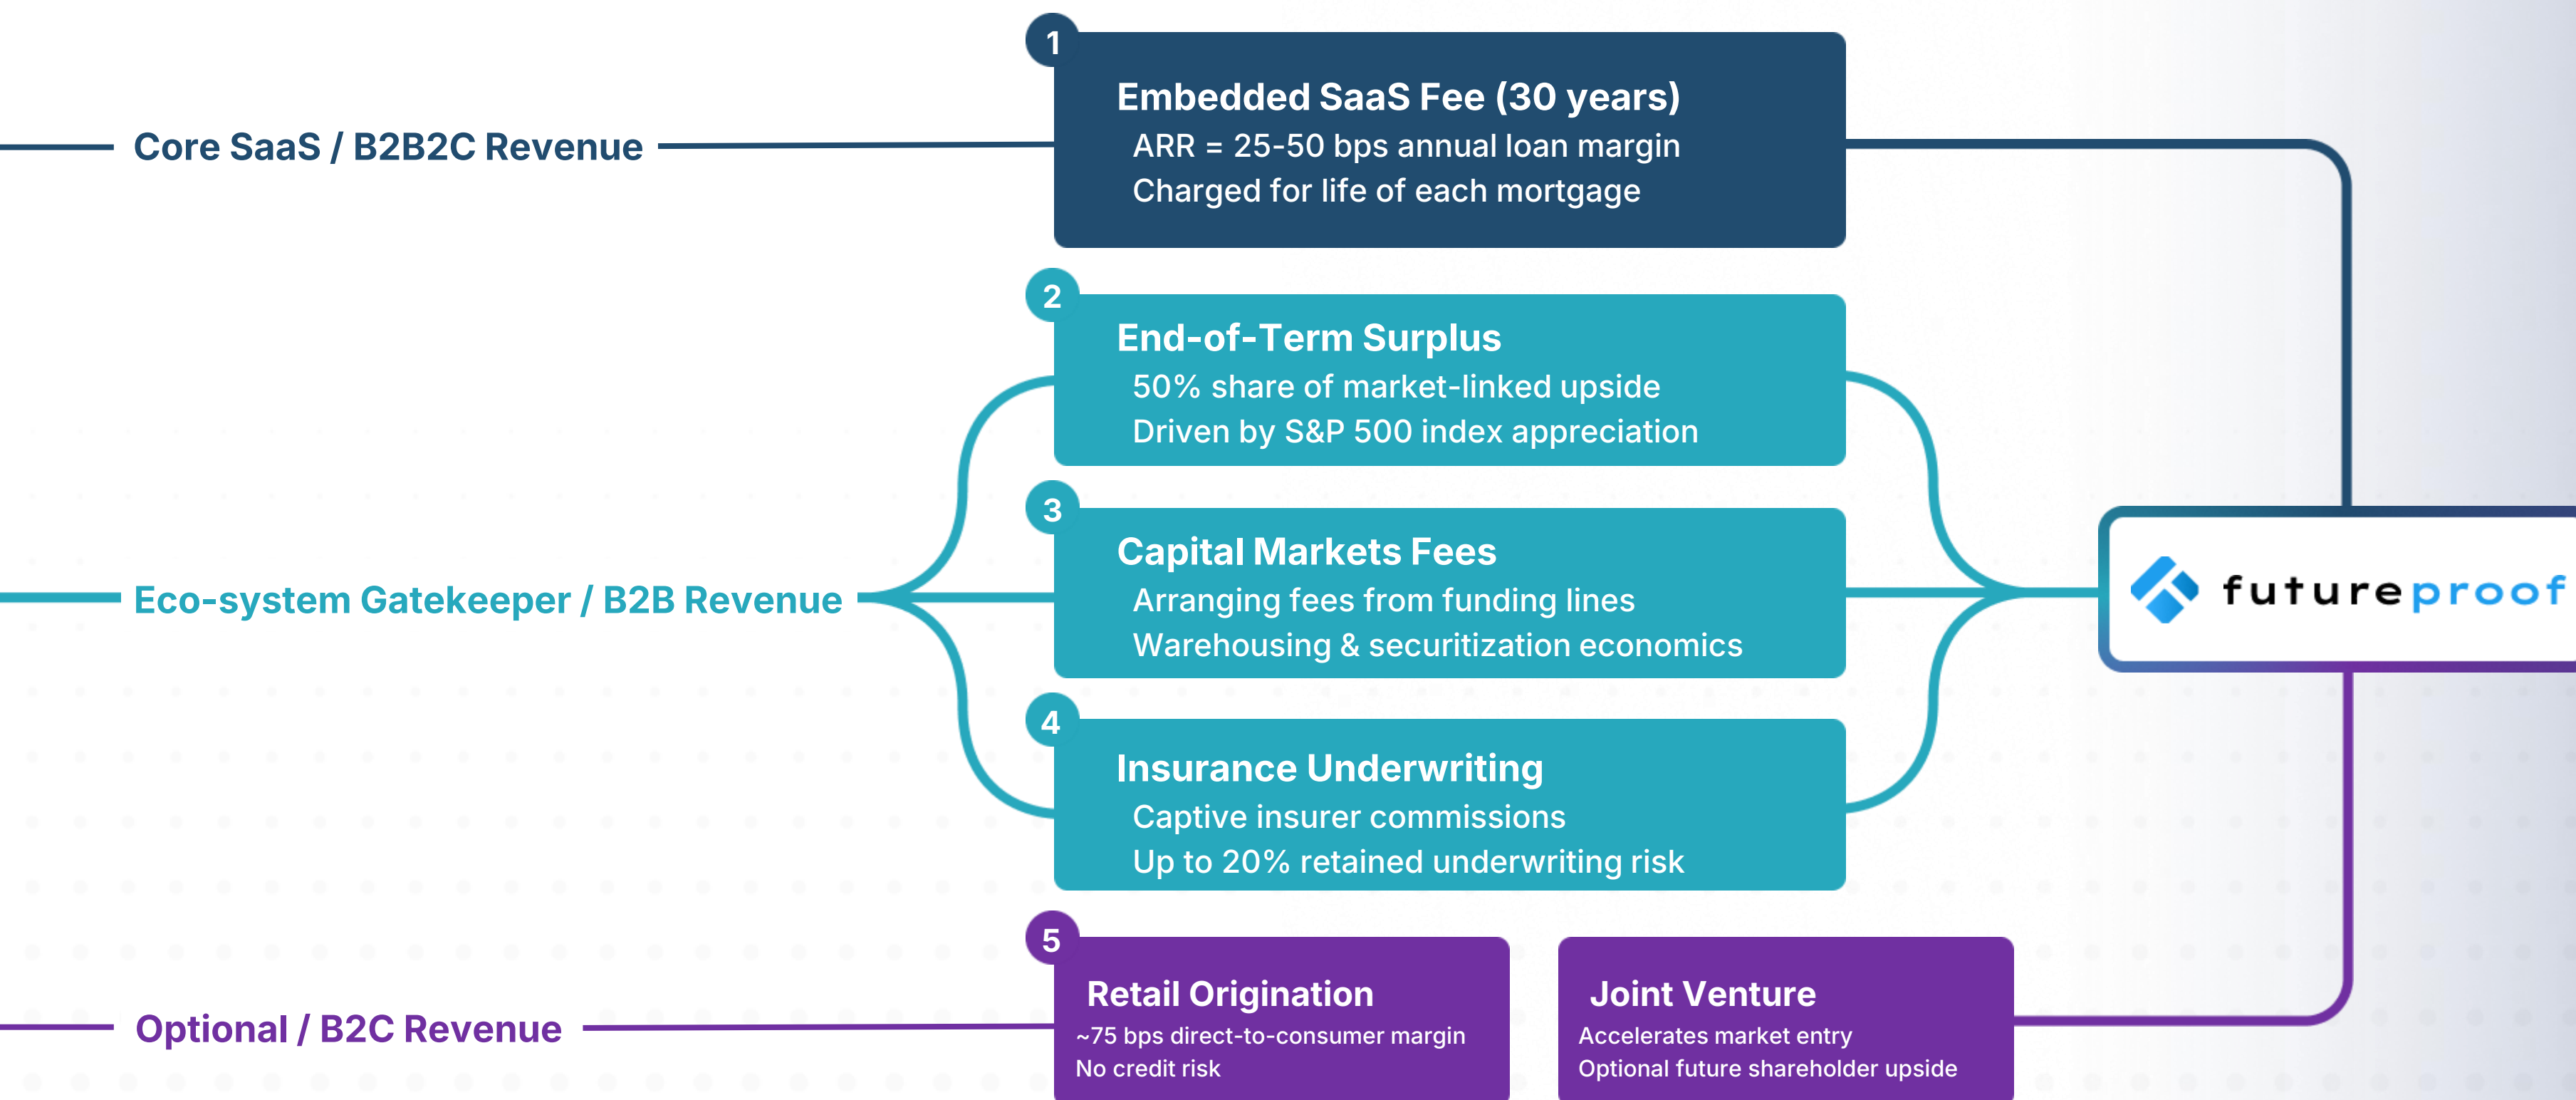

(Non-U.S.) Global/Regional Platform Partners (In Negotiation)

Market Sizing: Homeowners of any age with unencumbered residential property.

Business Model: SaaS fintech and eco-system play with 5 recurring revenue streams

GTM Strategy: We license banks, insurance carriers, and non-bank lenders as Product Issuers, to cross-sell to their aging customer base of homeowners.

Business and Growth Dynamics:

Customer Unit Economics (per B2B product issuer)

\$3M gross revenue / average mortgage
(over loan lifecycle)

\$114M long-term value / B2B customer
(5yrs only, undiscounted)

\$97M NPV / B2B customer
(5yrs only, discounted at 4.4% long-term stochastic cash rate)

\$1.5M CAC
(sales, legal, onboarding)

Market Rollout (# of product issuers)

Market Launch (AUS) Q3/2026 > Market Launch (UK) Q2/2027 > Market Launch (USA) Q4/2027

	2026	2027	2028	2029	2030	5yr Total
APAC/UK	1	2	2	2	2	9
USA		1	2	4	4	11
Total	1	3	4	6	6	20

**Rollout of Product Issuers over 5 years = \$1B ARR*

LTV:CAC = 65:1 compared to ~5:1 usual SaaS ratio
reflecting the extreme value capture of the Futureproof business in the first 5 years
(this ratio will reduce with substantial later-stage Series A investment in growth and global scaling, but remain well above market norms)

Competitive Landscape: Retirement products for asset-rich cash-poor.

Low Credit Risk / Low Cost

Poor Financial Outcomes / Low Risk-Adjusted Returns

Good Financial Outcomes / High Risk-Adjusted Returns

Risk / High Cost

Leadership Team

John R Innes

Co-Founder & Executive Director

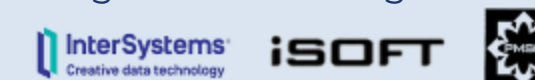

30+ years across insurance & insurtech (APAC, USA)
Former Head of Product, Australia's largest insurer
Co-founded, scaled & exited a leading digital insurer
Former National Commercial Manager, Allianz
\$750M+ annual premium portfolio

Denis Tebbutt

Chief Operations Officer

30+ years in banking, financial services & health technology
Former Regional Managing Director, InterSystems
COO roles across enterprise software & fintech
Background in management consulting

Wesley Chow

Chief Financial Officer

30+ years as CFO & Finance Director
Former Senior Accountant, KPMG
Senior Finance Director, BEA Systems
Former CFO & Regional Director, CustomWare

Matt Stone

Principal, Real Investment Analytics

Dr Tom Neilsen

Data Scientist

Predictive analytics, data modelling & computational neuroscience
Principal, Saltcorn Collective
Co-Founder, Advice Bridge (fintech)
Former Director, OpenBrain AI
Former Research Associate, Harvard Medical School

Why Now: Solving a fiscal train wreck as population ages to 2050.

- Deteriorating dependency ratio of **taxpaying working age : retirees (currently just 2:1)** increases **inter-generational unfairness and fiscal pressure** on funding an aging population
- Government response is to shift to **user-pay models** for retirement, healthcare, home care & aged care
- **Housing wealth increasing but remains illiquid**
- **Children cannot get into the housing market** without inter-generational transfer of preserved home wealth through inheritance

Thank You!

"Saving the Retirement of 36M Americans!"
