

Building the Next-Generation of Retirement Income & Funding Products for Every Life Stage.

Unlocking \$25T of locked-up retiree home equity. AI-native SaaS platform. AUS → UK → USA.

INVESTOR TEASER · FAMILY OFFICE

The Problem. 2.7M Australians + 36M Americans are asset-rich and cash-poor – sitting on **\$25T of home equity** with no fit-for-purpose product in 35 years. They're told to sell and downsize; most refuse. Australia's Retirement Income Covenant (2022) now legally requires every super fund to have a strategy. Most still don't.

The Product. The **Equity Preservation Mortgage®** – a breakthrough fit-for-purpose retirement mortgage embedded in an AI-native SaaS platform. Converts home equity into tax-free annuity income (1.05–1.50% of home value p.a., per term length). No monthly repayments, no compound interest, no estate erosion. Capital invested in a structured portfolio (~70% equity ETFs / ~30% fixed income) with continuous dynamic hedging via asymmetric collar (cap +40% / floor -20%). Property remains the homeowner's. Profit share at 3-yearly resets (10% to FP); 50/50 split at 30-year maturity.

Why this works (and reverse mortgages don't).

- For homeowners: no monthly repayments, no interest accrual eating the estate, lifetime income, equity preserved
- For wholesale funders: **mortgage income with equity-style returns** – long-duration, insured, securitisable, with profit-share upside from S&P appreciation. A new asset class, not a reverse-mortgage variant.
- Run-off mechanism eliminates prepayment risk for funders
- Validated against 50,000-path Monte Carlo (Futureproof's proprietary financial model, 30-year horizon, hard constraints C1–C6 satisfied): **PoC year-30 = 0.03 (3% portfolio capital shortfall probability)**, mean per-mortgage surplus year-30 = **\$1.17M (mean) / \$4.10M (99%-ile)** (USD)

Why now.

- Retirement Income Covenant (2022) – every AU super fund legally required to have a retirement income strategy; four years on, most still lack a credible solution
- Callaghan Review (2020) explicitly endorsed home equity release as a retirement tool
- AU has reverse-mortgage regulatory precedent under NCCP – clean path
- Demographic wave: 1 in 4 Australians over 65 by 2050; A\$3.5T in super needs retirement-phase infrastructure

Traction.

- **Accenture** – US Global Collaboration Partner & Approved Business Intermediary, providing access to top-tier financial-institution clients
- **Jones Day** – US Global Legal Partner
- **Product co-design** with BlackRock, SpiderRock, Atlas SP / Apollo, Lockton, PWC
- **Regulatory partners:** EY, Colin Biggers & Paisley Lawyers, Dentons (non-US)
- **In active negotiation:** Lockton Reinsurance, Gallagher Re, PIMCO (US platform); Munich Re, Macquarie, Asia Insurance Co (non-US)
- Selected for **Silicon Valley Fintech Accelerator (FinAccelerate, powered by Jones Day)** – 2023 cohort
- Multi-region calculation engine live (AU, NZ, UK, US); annuity calculator in alpha for user testing
- **Market launch:** AUS Q4 2026 → UK Q2 2027 → USA Q4 2027

Team.

- **John R Innes** – Co-Founder & Executive Director. 30+ years insurance / insurtech (APAC, USA); former Head of Product at Australia's largest insurer; co-founded, scaled & exited a leading digital insurer; ex-Allianz NCM (\$750M+ premium portfolio)
- **Senior Actuaries** – **Dr Pavel Shevchenko** (Professor, Macquarie U; ex-Principal Research Scientist, CSIRO; Director, Centre for Financial Risk) and **John De Ravin** (ex-Director Swiss Re; ex-Chief Actuary Munich Re; ex-member Australian Government Actuary)
- **Wesley Chow** – CFO. 30+ years CFO / Finance Director; ex-KPMG (Senior Accountant), BEA Systems (Senior Finance Director), CustomWare
- **Matt Stone** – CTO. 20+ years building regulated financial systems; former CTO across fintech & trading platforms (London, LA, Tokyo, Sydney)
- **Advisors:** James Huey (Chairman – ex-Head Retail/Commercial Banking, Westpac; 15-yr Director, Resimac); Dr Peter Langkamp OAM (ex-Director, Accenture Banking & Government); Margaret Rochford (CMO – ex-GM Marketing Allianz/IAG/ClearView)

The raise – Pre-Series A SAFE round.

- **Post-money SAFE · uncapped valuation · 30% discount** to the Qualifying Round (Series A Growth Equity Round, scheduled 2028)

- **Minimum investment: USD \$1M** · USD-denominated · AU-domiciled corporate
- **Discount reduces progressively** as each SAFE is issued and for any subsequent round – earliest investors capture the full 30%
- Side letter for follow-on / pro-rata to maintain equity position · MFN terms · No lead · Rolling close
- ESOP set at Series A: 5% new shares + 5% from founder shares
- Use of funds: AUS market launch (Q4/2026) + AI roadmap delivery + first 1-2 super-fund / Product-Issuer partnerships + 18-month runway to Series A 2028
- ESVCLP allocation available for qualifying AU investors via parallel AUD sub-tranche (10% offset + CGT exemption)

The ask. A 30-minute conversation. We'll walk through Futureproof's proprietary financial model validation, the live institutional partner ecosystem (Accenture, Jones Day, BlackRock), and the regulatory path.
